SUMMARY

Frontend Developer with **3+ years of experience** building scalable applications using **React.js, TypeScript, Redux Toolkit, REST APIs, and Micro-Frontend Architecture**. Delivered production features across **8+ micro-frontends** and **50+ reusable components and modules**, with expertise in workflow engines, dynamic forms, automated testing, accessibility, analytics, and cross-functional delivery.

SKILLS

• JavaScript (ES6+) • TypeScript • HTML5 • CSS3 • SASS • React.js • React Native • Redux • Redux Toolkit
• React Router • Responsive Web Design • Micro-Frontend Architecture • Webpack Module Federation
• Reusable Components • State Management • Node.js • Express.js • REST APIs • JWT • OAuth • MongoDB
• Jest • React Testing Library • Unit Testing • Integration Testing • WCAG • ARIA • Amplitude
• Git • GitHub • GitLab • Bitbucket • Turborepo • Webpack • Jira • Agile • Scrum • CI/CD

PROFESSIONAL EXPERIENCE

Frontend Development Engineer

July 2023 – Present

AVIZVA Solutions • Gurugram, India

- Build and maintain **React.js and TypeScript applications** using **Micro-Frontend Architecture, Webpack Module Federation, and React Router** across 8+ independently deployable modules.
- Delivered **50+ reusable React components and modules**, improving consistency, maintainability, code reuse, and engineering velocity across enterprise applications.
- Built **Form Engine and Process Engine** modules for dynamic rendering, validation, configurable workflows, and conditional routing driven by user actions, APIs, application state, and business rules.
- Optimized validation and state-management flows to eliminate race conditions and duplicate rendering, reducing related UI issues by approximately **30%**.
- Implemented **Jest and React Testing Library** tests, applied **WCAG and ARIA** accessibility practices, and integrated **Amplitude** analytics.
- Reviewed pull requests, mentored developers, and served as a **shadow lead** in a 40+ member engineering environment.

Web GIS Intern

June 2022 – August 2022

Defence Research and Development Organisation (DRDO) • Delhi, India

- Contributed to a real-time **geospatial monitoring system** for defense operations using **OpenLayers, GeoServer, JavaScript, and jQuery** for interactive mapping and location-based visualization.
- Developed APIs and location services using **Spring Boot, Hibernate, PostgreSQL, and PostGIS** to visualize camps, supply points, and operational data.

EDUCATION

B.Tech in Information Technology | CGPA: 8.4/10

2019 – 2023

Amity University, Gurgaon

Coursework - Minor in Positive Psychology

ACHIEVEMENTS

Best Performer Award - Recognized for consistent ownership, collaboration, engineering quality, and contribution to successful project delivery.

PERSONAL PROJECT

TravelsTREM

app.travelstrem.com

Tech Stack: React.js | TypeScript | Turborepo | Micro-Frontends | Module Federation | Redux Toolkit | Node.js | Express.js | MongoDB

Architected TravelsTREM as a **Turborepo monorepo** with a shared App Shell and independently developed micro-frontends for **Trevio, Trevista, TreCare, and TreHub**, supported by admin and partner portals. Built reusable **booking, pricing, form-validation, payment, and workflow engines** for configurable journeys, dynamic pricing, traveler details, add-ons, reservation flows, and payment states. Created shared UI, design-system, authentication, API-client, validation, permissions, analytics, notifications, search, wishlist, and document packages. Developed Node.js, Express.js, and MongoDB services secured with JWT, OAuth, rate limiting, and REST APIs.
